

Education to Slum Children

Education is the right of human being. Education is important for the personal, social and economic development of the nation. Education is important to live with happiness and prosperity. Education empowers minds that will be able to conceive good thoughts and ideas.

Education is only one thing that can remove corruption, unemployment, and environmental problems. Education is not about doing degree it is about how you can live with your own feet.

A good education does not simply consist of going to school or college to get a degree. It goes beyond that. If someone is able to read or write, has gone to school and attained a degree, it does not mean he has a complete education. This is just a part of the knowledge that makes him aware of what is important in the world, and since most of the world wants a degree from him, he goes ahead and gets a degree. In this process, he gets the capability to know what is important for him, what is wrong and what is right.

In many parts of the world, kids would give anything to sit in a classroom with a teacher who cares about their future, in a stable building with ample books and supplies. But because of various reasons—war, poverty, gender inequality many kids around the world don't get this chance. Poverty is main issue because of which poor children can't get the education. Government schools are not as good and private schools are expensive.

To help such poor children, staff and students of ASM group of Institutes took

initiative of teaching to slum children on 14th November 2017. Faculties taught English alphabets, Marathi alphabets to the children. They gave education about importance of self hygiene as well as cleanliness of surrounding area. Also, we made the children aware about the importance of attending the school every day. Children's response was really great and they were listening very patiently what we told and promised us to follow the things told by us.
