ASM Group of Institutes' Institute of Professional Studies organised a session on Industry 4.0 on Wednesday, 20th November 2019 at IPS campus for all HR professionals, Entrepreneurs, Professionals working in companies, Businessmen, Students of profession courses.

A dynamic era of change in the world of work will introduce the Industrial Revolution 4.0, which will be shaped by a range of new technologies and innovations that bring us driveless cars, smart robots, virtual reality (VR) for the digital world, the Internet of Things (IoT), connected devices, Artificial Intelligence (AI) and 3D printing. This revolution is happening right now and it is bringing unprecedented advances in technology. According to the Future of Jobs summary on the World Economic Forum "By 2020, more than one third of workers will need skills they don't now have. While necessary talents can vary, 36% of business jobs will require "Complex problem solving" as a core skill. Such type of aspects and many more were discussed in session.

In today's scenario such kind of session can improve efficiency in all sense. The session was successful and everyone got benefited out of it
