

Emerging trends in Information Technology

Date- 12th August 2020

Time- 05:00pm

Speakers: Mr. Chirag Oswal, Solution Architect at Amazon Internet Services Private Limited.

Amazon Web Services (AWS) organized online workshop on Emerging trends in information technology on 12th August 2020.

Welcome speech was given by Prof. Anant Gijare, CTO-ASM Group of Institutes, Ex – CIO Adani Group.

Mr. Chirag Oswal, shared information on what are the emerging trends in technology then he explained Emerging trends in Information Technology like Cloud technology, AI & ML. He also explained about Computing power, big data analytics, extended reality, digital trust, new energy solutions, 5G and sustainable tech. While talking about AI he said Artificial intelligence is poised as a tool of choice for businesses and solution providers. As is often seen with social media, AI, combined with machine learning, deep learning and neural networks, can be a powerful combination. Businesses can use AI to achieve cost-saving benefits, streamline business processes, improve the customer experience, enable more efficient communications through chatbots, increase customer satisfaction and provide insight into purchasing behavior to inform decision-making.

All students got information on Emerging trends in IT and understood where exactly they can opportunity in career development. Session was very useful to students.

Prof. Ramesh Mahadik, (Director ASM's IMCOST, Thane) gave vote of thanks on behalf of Audyogik Shikshan Mandal.
